

VIRTUAL OFFICE

Create A website that can be used as a reusable component to be sold for companies to be able to control all their department, employee and projects easily. Create Departments and all functionalities for departments. Create Notice manager , create a project manager, and also a authority section which will be used for providing authority on the basis of their ranks. Chat section for departments and projects. In Department Section add tasks adding section like moodle and also add file adding and working on file section.
